School of Nursing

Body Image and Sexuality Research in Head and Neck Cancer

Bethany Andrews Rhoten, PhD, RN

bethany.rhoten@vanderbilt.edu

MARY RAGLAND DODCHAUX HALL

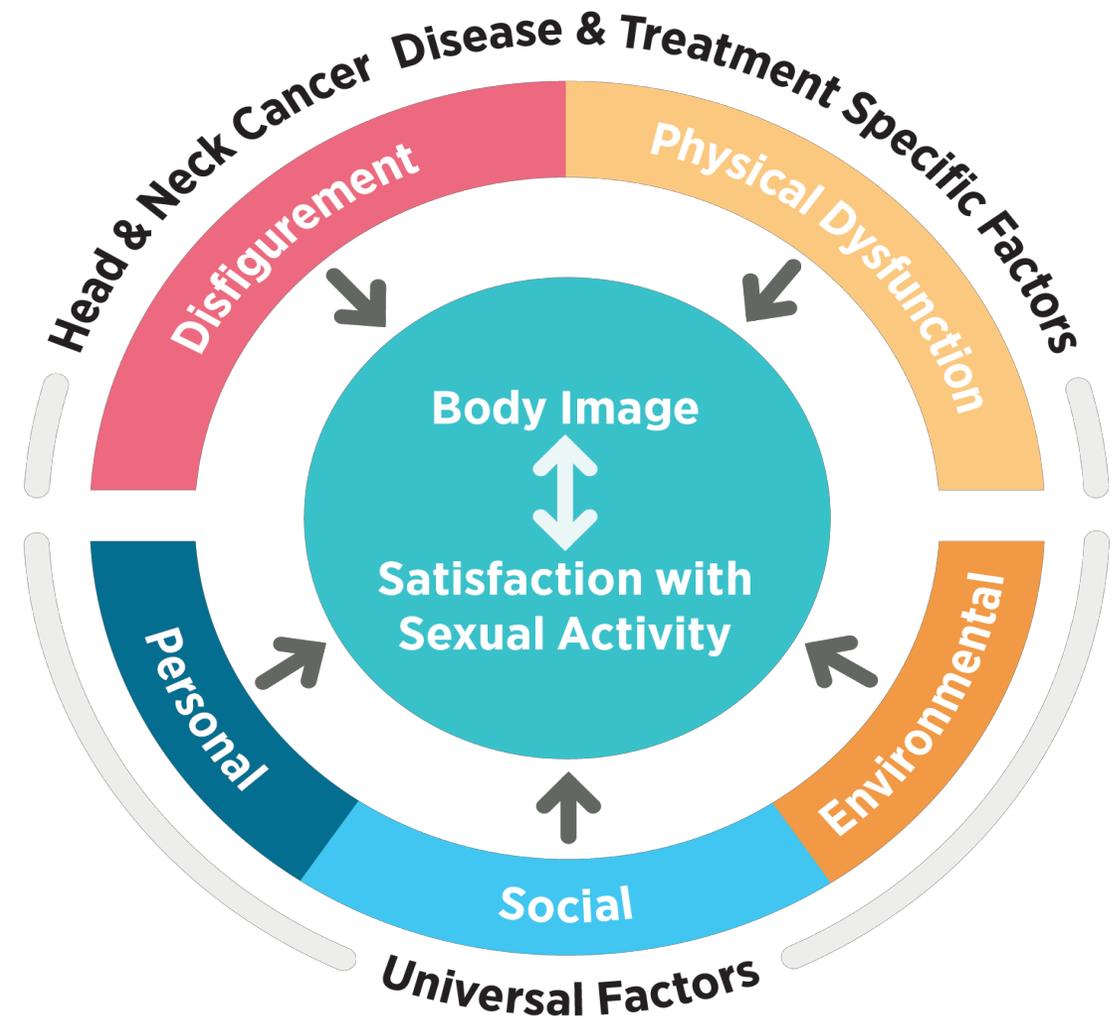

Overview of Presentation & Learning Objectives

- ▶ Describe the latest evidence detailing the impact of head and neck cancer (HNC) and its treatment on body image and sexuality.
- ▶ Describe measurement of body image and sexuality in HNC research
- ▶ Describe the state of intervention research in this area
- ▶ Identify important research gaps

Body Image and Sexuality

- ▶ Body Image – how an individual feels about the way they look and function
- ▶ Sexuality – an individual’s experience of sexual activity and sexual satisfaction

State of the Science

- ▶ **Rhoten BA, Murphy B, Ridner SH (2013)** Body image in patients with head and neck cancer: a review of the literature. *Oral Oncology*. 49(8):753-760.
<https://doi.org/10.1016/j.oraloncology.2013.04.005>
— Cited by 60
- ▶ **Rhoten BA (2016)** Head and neck cancer and sexuality: a review of the literature. *Cancer Nursing*. 39(4):313-320.
<https://doi.org/10.1097/NCC.00000000000000289>
— Cited by 12

Search Strategy

- ▶ Body Image and Head and Neck Cancer
 - ("head and neck neoplasms"[MeSH Terms] OR ("head"[All Fields] AND "neck"[All Fields] AND "neoplasms"[All Fields]) OR "head and neck neoplasms"[All Fields] OR ("head"[All Fields] AND "neck"[All Fields] AND "cancer"[All Fields]) OR "head and neck cancer"[All Fields]) AND ("body image"[MeSH Terms] OR ("body"[All Fields] AND "image"[All Fields]) OR "body image"[All Fields]) AND ("2009/05/19"[PDat] : "2019/05/16"[PDat])
 - 337 (abstract review) → 55 (full text review) → 32 (final sample)
- ▶ Sexuality and Head and Neck Cancer
 - ("head and neck neoplasms"[MeSH Terms] OR ("head"[All Fields] AND "neck"[All Fields] AND "neoplasms"[All Fields]) OR "head and neck neoplasms"[All Fields] OR ("head"[All Fields] AND "neck"[All Fields] AND "cancer"[All Fields]) OR "head and neck cancer"[All Fields]) AND ("sexuality"[MeSH Terms] OR "sexuality"[All Fields] OR "sexual behavior"[MeSH Terms] OR ("sexual"[All Fields] AND "behavior"[All Fields]) OR "sexual behavior"[All Fields]) AND ("2014/05/18"[PDat] : "2019/05/16"[PDat])
 - 109 (abstract review) → 26 (full text review) → 22 (final sample)

Body Image & Head and Neck Cancer – Measurement

Current Utilization in Research

- ▶ Adapted Satisfaction with Appearance Scale
- ▶ Appearance Schemas Inventory-revised**
- ▶ Derriford Appearance Scale-24&59
- ▶ Body Image Coping Strategies Inventory
- ▶ Body Image Disturbance Questionnaire**
- ▶ Body Image Quality of Life Inventory
- ▶ Body Image Scale**
- ▶ Body Image Survey (HN specific)
- ▶ Body Satisfaction Scale
- ▶ Fear of Negative Appearance Evaluation Scale**
- ▶ Head and Neck Scale – Appearance Subscale
- ▶ Multidimensional Body-Self Relations Questionnaire
- ▶ Quality of Life Measures
 - EORTC QLQ C30 and HN35
 - FACT-HN
 - Patient Concerns Index
 - UW-QOL

Body Image & Head and Neck Cancer – Measurement

- ▶ Appearance Schemas Inventory-Revised
 - Cash, Melnyk, & Hrabosky 2004
 - 20 items
 - Self-evaluative salience
 - Motivational salience
 - <http://www.body-images.com/assessments/asi.html>

Body Image & Head and Neck Cancer – Measurement

- ▶ Body Image Disturbance Questionnaire
 - Cash et al 2004
 - 7 scaled items
 - Preoccupation with appearance-related concerns
 - Distress and impairment in function
 - Behavioral avoidance
 - <http://www.body-images.com/assessments/bidq.html>

Body Image & Head and Neck Cancer – Measurement

- ▶ Body Image Scale
 - Hopwood et al 2001
 - 10 items
 - Satisfaction with appearance related changes associated with cancer treatment
 - Affective, behavioral, and cognitive domains
 - <https://www.ncbi.nlm.nih.gov/pubmed/11166145>

Body Image & Head and Neck Cancer – Measurement

- ▶ Fear of Negative Appearance Evaluation Scale
 - Lundgren, Anderson, & Thompson 2004
 - 6 items
 - Apprehension about appearance evaluation
 - <https://www.ncbi.nlm.nih.gov/pubmed/15000956>

Body Image & Head and Neck Cancer – Measurement

Opportunities for Future Utilization

- ▶ McGill Body Image Concerns Scale - HNC
 - Rodriguez et al 2019

 - 21 items

 - Social discomfort

 - Negative self-image

Body Image & Head and Neck Cancer – Descriptive Research

Cross-sectional Studies

- ▶ HNC patients undergoing surgery have body image concerns both pre- and post-procedure.
 - Teo et al 2016; Chen et al 2015; Fingeret et al 2012; Fingeret et al 2010
- ▶ Body image concerns affect 33-75% of patients.
 - Airoidi et al 2011; Fingeret et al 2012
- ▶ Body image concerns are associated with a variety of:
 - Behaviors
 - Decreased smiling intensity
 - Speaking less
 - Social avoidance as a coping mechanism
 - Characteristics
 - Younger age
 - Female gender
 - Advanced tumor stage
 - Oropharyngeal carcinoma
 - Comorbidities
 - Depression
 - Reduced functional well-being
- Nixon et al 2018; Chen et al 2015; Lee et al 2015; Flexen et al 2012; Fingeret et al 2010

Body Image & Head and Neck Cancer – Descriptive Research

Longitudinal Studies

- ▶ Rhoten et al 2014
 - Body image significantly higher at 12 weeks-post treatment than at end of treatment and 6-weeks post-treatment
 - Body image and depressive symptoms significantly associated

- ▶ Clarke et al 2013
 - No significant differences in body image from baseline (at least six months after treatment) and nine months after baseline.

Body Image & Head and Neck Cancer – Intervention research

Cosmesis-focused

- ▶ Chen et al. (2017).
 - 4 session skin camouflage training program
 - Intervention participants greater improvement in body image than control group

- ▶ Brake et al. (2014).
 - Post-treatment liposuction for submental lymphedema
 - Self perception of appearance significantly improved from pre to post procedure

Sexuality & Head and Neck Cancer - Measurement

Current Utilization in Research

- ▶ EORTC QLQ H&N35
 - During the past week:
 - *Have you felt less interest in sex?*
 - *Have you felt less sexual enjoyment?*
- ▶ FACT-H&N; FACT-NP
 - *I am satisfied with my sex life.*
- ▶ Arizona Sexual Experiences Scale
 - During the past week:
 - How strong is your sex drive?
 - How are you sexually aroused?
 - M only: Can you easily get and keep an erection?
 - F only: How easily does your vagina become moist or wet during sex?
 - How easily can you reach an orgasm?
 - Are your orgasms satisfying?
- ▶ modified Sexual Adjustment Questionnaire
 - *What is the importance of sexual activity in your life?*
 - *Do you enjoy sexual activity?*
 - *Do you have a desire for sexual activity?*
 - *Do you feel satisfied after sexual activity?*
 - *How often do you have sexual activity?*
 - *Are you satisfied with the frequency of sexual activity in your life?*
 - *Have you been the one to initiate sexual activity with your partner since your last cancer treatment?*

Sexuality & Head and Neck Cancer - Measurement

Opportunities for Future Utilization

- ▶ MHK Questionnaire (Hoole et al 2018)
 - 22 items
 - Problems with intimacy after dx/tx of HNC
 - HNC-specific issues that may affect desire for intimacy

- ▶ EORTC QLQ-SHQ22
 - 22 items
 - Sexual health and cancer
 - Phase IV of development

Sexuality & Head and Neck Cancer – Descriptive Research

Cross-sectional Studies

- ▶ Sexuality is one of the highest unmet supportive care needs among HNC survivors.
 - So et al 2019; Jansen et al 2018
- ▶ Sexuality is under addressed in clinic notes
 - Rogers 2015
- ▶ Patients who have had a total laryngectomy have significantly more sexual problems than those having had a partial laryngectomy
 - Akil et al 2017; Batiog et al 2017; Offerman et al 2015
- ▶ Reduced sexuality is associated with depression
 - Obrien et al 2017; Suzuki et al 2016

Sexuality & Head and Neck Cancer – Descriptive Research

Longitudinal Studies

- ▶ Sexuality is significantly impaired without return to baseline.
 - Bozec et al 2018; Melissant et al 2018; Bui et al 2018; Taberna et al 2017; Mair et al 2017
- ▶ Poorer sexuality outcomes are associated with:
 - Older age
 - Trouble with social contact / poor social functioning
 - Weight loss
 - Constipation before treatment
 - Female gender
 - Total laryngectomy
 - Poor nutritional status
 - BMI > 25
 - Melissant et al 2018; Bui et al 2018; He et al 2017; Egestad-Nieder 2015

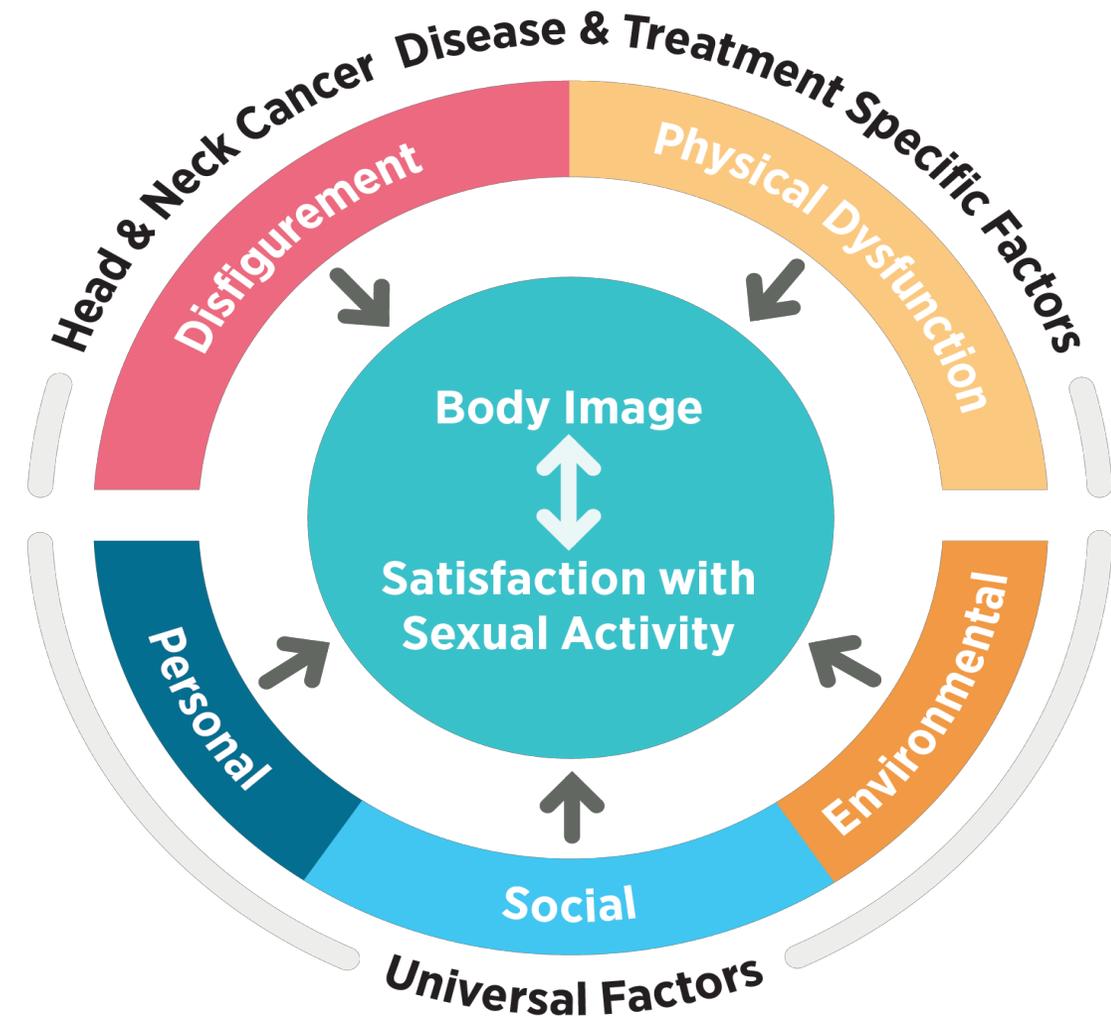

Sexuality & Head and Neck Cancer - Intervention Research

- ▶ Hoole, Kanatas, & Mitchell. (2015). Psychosexual therapy and education in patients treated for cancer of the head and neck. *British Journal of Oral and Maxillofacial Surgery*, 53: 601-606.
 - Introduce strategies for diagnosis and treatment of psychosexual problems
 - Describe early experiences of use
 - Brief narratives and case reports

- ▶ Intervention development and formal testing is lacking at this time.

Summary

- ▶ Body image and sexuality issues are problematic for some, if not many patients with head and neck cancer.
- ▶ These issues do not end after completion of treatment and may be more salient to a patient as time elapses.
- ▶ In order to meaningfully assess body image and sexuality in this population, self-report measures should provide both clinically actionable and research-applicative information.

Important Research Gaps

- ▶ Intervention Research
 - Population and patient characteristic tailoring
 - Psychosocial focus
 - Practical, real world examples

- ▶ Addressing concerns of patients who are not partnered

- ▶ Addressing concerns of patients who identify LGBTQ+

Acknowledgements

- ▶ International Society of Oral Oncology
- ▶ Dr. Barbara Murphy
- ▶ Patients with Head and Neck Cancer
