2019

21-23 JUNE
SAN FRANCISCO

SUPPORTIVE CARE
MAKES EXCELLENT
CANCER CARE POSSIBLE

When early integrated PC vs on-demand PC:

Positive effect on QOL soon after diagnosis
and near the end of life

Patients and palliative care professionals have more time

- to build a relationship
- to focus on coping with the progressive and worsening illness
- to address decision making in relation to cancer treatment and end-of-life care
- to enhance symptom assessment and management.
